

COVID-19 BUSINESS DECONTAMINATION & STERILIZATION

Let us assist you with an effective solution to comply with post-lockdown hygiene requirements.

Our decontamination and sterilization procedures comply to Internationally recognised standards by utilising methods that effectively eliminate contaminants.

Fogging releases a steady stream of droplets in the form of a dense disinfectant fog, which settles onto surfaces and penetrates hard to reach spaces that cannot be reached through normal cleaning methods.

Benefits:

- ❖ Bulk decontamination and sterilization of high-touch and high-traffic areas
- ❖ Safe for humans, animals, fabrics, electronic equipment and is Biodegradable
- ❖ Fast, effective and economical application (minimum down-time)
- ❖ Optimal coverage and penetration
- ❖ Broad-spectrum biocide inhibits growth and living organism activity
- ❖ 99.9999% effectiveness against bacteria, fungi and viruses
- ❖ Compliments regular cleaning methods

Applications:

- ❖ Office Spaces
- ❖ Shopping Centres & Service Stations
- ❖ Transport: Business, Public & Private
- ❖ Warehouses & Factories
- ❖ Mining & Process Plants
- ❖ Medical & Health Care Facilities
- ❖ Schools, Creches & Universities
- ❖ Personal Residences
- ❖ Restaurants, Bars & Kitchens
- ❖ Entertainment Venues
- ❖ Conference Facilities
- ❖ Fitness Centres
- ❖ Libraries
